GitHub: github.com/MaheshwaramGanesh
Email: ganeshmaheshwaram2005@gmail.com
Mobile: +91 9491759342

SKILLS

Languages:	C/C++, Java, JavaScript (ES6+), TypeScript
Frontend:	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend:	Spring Boot, Node.js, Express.js, REST APIs, WebSocket, Socket.IO, JWT Authentication
Tools/Platforms:	Git, GitHub, Postman, VS Code, Docker, Android Studio
Cloud & DevOps:	AWS (EC2, Elastic Beanstalk, Lambda Function, Dynamo DB, S3, VPC), Docker, CI/CD, Git
Databases:	MongoDB, MySQL, Redis, Firebase Realtime Database, Supabase
Artificial Intelligence:	Generative AI, LLM Integration, Prompt Engineering, RAG, AI Agents, MCP
Soft Skills:	Time Management, Problem-Solving, Adaptability, Quick Learner, Communication

INTERNSHIP

AI Engineer Intern (Virtual) | Infosys Springboard **Feb 2026 – Apr 2026**

- Developed an AI-Driven Oil Spill Identification and Monitoring System using Artificial Intelligence, Machine Learning, and Computer Vision concepts for automated environmental monitoring.
- Applied image preprocessing, feature extraction, image classification, and model evaluation techniques to improve oil spill detection accuracy from visual data.
- Gained hands-on experience in Python, Deep Learning, Computer Vision, Image Processing, AI model development, and Agile-based project workflows while successfully completing the industry internship.

Tech Stack: Python, Artificial Intelligence (AI), Machine Learning (ML), Deep Learning, Computer Vision, Image Processing

PROJECTS

AegisTrace — AI Agent Governance, Safety & Observability Platform | GitHub **Oct 2026**

- Developed an AI agent governance platform with human-in-the-loop approval, deterministic policy enforcement, and end-to-end traceability to ensure controlled, auditable execution of sensitive AI-driven actions.
- Engineered a Retrieval-Augmented Generation (RAG) pipeline using PostgreSQL, pgvector, 384-dimensional embeddings, and hybrid vector–lexical search, enabling versioned knowledge retrieval, grounded citations, and evidence-based abstention with 401 ms p95 retrieval latency.
- Implemented a secure agent control plane with 4-role RBAC, workspace isolation, immutable agent and knowledge versioning, approval workflows, idempotent tool execution, and asynchronous job processing; achieved 533 ms p95 queue pickup and integrated OpenTelemetry distributed tracing, Prometheus, and Jaeger.

Tech Stack: Spring Boot, Python, Next.js, TypeScript, PostgreSQL, pgvector, Redis, Docker, OpenTelemetry, Prometheus, Jaeger

Virtuara AI | AI-Powered Learning Platform | GitHub **Oct 2026**

- Developed a full-stack AI learning platform using Next.js, React, and Django, enabling multi-subject learning through a unified AI mentor with personalized explanations, adaptive assessments, and persistent learning progress.
- Implemented a shared voice interaction system using browser-based speech recognition, text-to-speech, and REST APIs, integrating conversational learning, interactive quizzes, and interview sessions.
- Built a resume-based mock interview system with secure file uploads, automated resume parsing, contextual follow-up questions, server-side session management, and persistent interview reports using PostgreSQL, Redis, and Celery. Validated learning and interview functionality with 19 passing automated tests.

Tech Stack: Python, Django, Next.js, React, PostgreSQL, Redis, Celery, Speech Recognition, Text-to-Speech, Docker.

TRAINING

Data Structures and Algorithms | LPU **Jun 2025 - Jul 2025**

- Built strong fundamentals in Data Structures and Algorithms (DSA), focusing on improving coding logic, problem-solving abilities, and algorithmic thinking.
- Practiced core data structures including arrays, linked lists, stacks, and queues, along with key algorithmic techniques for developing efficient and optimized solutions.
- Analyzed time and space complexity of different approaches and practiced optimizing solutions to improve performance, efficiency, and overall code quality.

CERTIFICATES

- AI Foundation Associate | Oracle **Mar 2026**
- React (Basic) Certification | HackerRank **Jan 2026**
- Introduction to Large Language Model (LLMs) | NPTEL IIT Delhi **Oct 2025**

ACHIEVEMENTS

Mastered 200+ problems on online coding platforms

- Solved 200+ algorithmic problems across LeetCode and HackerRank with sharpening problem solving skills.
- Earned 100 Day badge on LeetCode and in HackerRank a 5-star rating in C++ for performance.

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; CGPA: 7.05 Aug 2024 – Present

Sree Datta Engineering and Science College Hyderabad, Telangana
Diploma — Computer Science; Percentage: 77% Aug 2021 – Apr 2024

Telangana State Model School Jangaon, Telangana
Matriculation; CGPA: 9.5 Jun 2020 – May 2021
