Skills

- **Languages:** C/C++, DSA, Java, JavaScript, Python (Basics)
- **Frameworks & Libraries:** HTML, CSS, Tailwind CSS, ReactJS, NodeJS, Express
- **Tools/Platforms:** Git, GitHub, Postman, VS Code, Android Studio, Docker
- **Databases:** MySQL, MongoDB, Firebase Realtime Database
- **Soft Skills:** Problem-Solving, Team Player, Adaptability
- **Artificial Intelligence:** Generative AI, Prompt Engineering, RAG, LLM, AI Agents, MCP

Projects

- **Pulse Chat – A Chat bot Web Application | GitHub** Feb 2026 – Mar 2026

• Engineered a cross-platform real-time messaging system using Web-Sockets, enabling low-latency communication and high responsiveness across web and mobile.

• Architected a scalable full-stack solution with Node.js, Express, Next.js, and React Native, leveraging TypeScript for type safety and robust code quality.

• Delivered a production-ready application by owning end-to-end development, including backend services, real-time infrastructure, UI development, and system integration.

Tech: TypeScript, Next.js, React Native, Node.js, Express.js, Socket.IO (Web-Sockets).

- **Subject Material Management System | GitHub** Jan 2026 – Feb 2026

- Built and shipped a full-stack academic content platform with role-based dashboards (Faculty/Student), enabling structured subject management, secure file uploads (≤100MB), real-time preview, and seamless download workflows.
- Engineered a RESTful API using Node.js and Express, integrated with PrismaORM, to optimize file handling and reduce server response time by 25%, improving user experience across platforms.
- Owned the end-to-end product lifecycle — from database schema design to responsive React UI — delivering a clean, production-ready system with clear separation of concerns and scalable folder architecture.

Tech: React (Vite), Node.js, Express.js, Prisma ORM, Tailwind CSS, REST APIs, MongoDB, File Handling.

Training

Data Structures and Algorithm, LPU - Link Jun 2025 – Jul 2025

- To build strong fundamentals in Data Structures and Algorithms (DSA) for improving coding logic, problem-solving skills, and technical interview readiness.
- Practiced core data structures (arrays, linked lists, stacks, queues) and key algorithmic techniques including sorting, searching, recursion, backtracking, and greedy algorithms through hands-on exercises.
- Gained the ability to analyze time and space complexity, write optimized solutions, and apply algorithms to real-world problem scenarios.

Certificates

- Introduction to Large Language Models (LLMs) - NPTEL IIT Delhi | **Link** Nov 2025
- The Java Certification Course | Neo Colab | **Link** May 2025
- DSA Certification | Neo Colab | **Link** Dec 2024
- Fundamentals of Network Communication | Coursera | **Link** Oct 2024

Achievements

- Solved 100+ coding problems across Leet-Code, GFG & Hacker Rank, sharpening problem-solving skills.
- Earned badges on Leet Code and Hacker Rank, including a 5-star rating in C++ for performance.

Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.49*** *August 2024 - Present*
- **Sree Datta Engineering and Science** Hyderabad, Telangana
  Diploma; ***Percentage: 77*** *August 2021 - April 2024*
- **Telangana State Model School** Jangaon, Telangana
  Matriculation; ***Percentage: 95*** *June 2020 - May 2021*
